## FRONTEND DEVELOPER

### ABOUT ME

I am a Frontend Developer with 1 year of experience, specializing in building dynamic web applications. My primary focus lies in using React and Next.js to create responsive and user-friendly sites and apps. I've also gained little experience in writing backend code using NodeJS during my previous role.

I approach every project with a strong sense of responsibility, striving for the highest quality in my work. My collaborative nature makes me well-suited for team environments.

### EXPERIENCE

May 2022 - September 2022  
Freelance

#### Frontend developer

I worked as a frontend developer used ReactJS, almost 4 months for company called Qubyx, i did a web application for help handling their product, also i did backend to this application on NodeJS.

January 2023 - Present  
Freelance

#### Frontend developer

Engaged in multiple freelance projects, including the development of the web application "Ednist-construction" for build company Utilized a tech stack consisting of React with TypeScript for robust and type-safe components.
